

## **Final Written Reflection Essay**

Reflection is the final component for completing your data collection requirements. Having students write about their experiences will often create meaning from service. This will enable you as the teacher and us as the evaluators to see what learning has occurred during students' service.

Please use these questions for discussion prior to having students write at least a 1-3 page essay discussing their service experience.

### **Prompts for discussion prior to writing the essay:**

1. What were the best things you learned during your service project?
2. What were the challenges you had to meet during your service project?  
How did you meet them?
3. What did you learn about your value to your community?
4. Did the service you performed help or change anything in you?

Thank you for a job well done!
